

Project Overview

As of March 20, 2012

Street Resurfacing 2010 Program – Project 5

Description and Benefits: Street resurfacing improves ride quality, reduces street maintenance expenses and serves as a means of renewing and prolonging the life of roads and highways. The work consists of milling the existing pavement, overlaying with new asphalt and replacing curbs and sidewalks, only as necessary, in order to accommodate new *Americans with Disabilities Act*-compliant curb ramps. Plans call for partial depth pavement repair only as needed.

Fifty-five percent of typical project costs go toward resurfacing, partial/full depth pavement repairs and curb repairs; 35% for curb ramps and 10% for construction inspection.

Schedule:

Design
Construction and inspections

Start

2009
summer 2010

Completion

2009
spring 2012

Status:

Construction in progress.

Costs:

Construction and inspections \$5.3 million - estimated

Contact Information:

Construction Project Manager: Paul Chilton, P.E., tel. (614) 645-0411
Designer: City of Columbus
Construction Contractor: Shelly & Sands, Inc.
